

Shivang Singh

Android Developer | Full Stack Developer

📞 +91-8115698804 | ✉️ shivangsinghblw@gmail.com | 🔗 LinkedIn | 🐙 GitHub | 🚀 LeetCode

PROFESSIONAL SUMMARY

Android and Full Stack Developer experienced in building scalable mobile and web applications using Kotlin, React.js, Node.js, Express.js, and MongoDB. Skilled in REST API development, authentication systems, performance optimization, and scalable application architecture.

EDUCATION

JSS Academy of Technical Education, Noida
Bachelor of Technology – Information Technology

Nov 2022 – Present
CGPA: **7.8/10**

EXPERIENCE

7systems Technology Pvt Ltd, Ghaziabad
Android Developer Intern

Apr 2025 – Jul 2025

- Worked on API integration and improved application stability through proper error handling.
- **Reduced crash rates by 25%** through performance optimization and debugging of critical Android features, improving overall user experience and responsiveness.
- **Improved release quality by 35%** through functional and regression testing of Android application features.

Career Crush (Remote)
Full Stack Developer Intern

Jul 2025 – Oct 2025

- Developed and optimized RESTful APIs using Express.js and Node.js to handle seamless data flow between the frontend and MongoDB database.
- **Strengthened application security and reduced unauthorized access risks by 40%** through implementation of authentication mechanisms and RBAC.
- Collaborated with senior developers to understand the application flow, review code and seamlessly merge stability fixes into the main codebase.

PROJECTS

zentroPay | React, Express, MongoDB, Redis

🐙 GitHub

- **Reduced API response time by 40%** through Redis caching and optimized backend request handling, improving application scalability.
- Implemented comprehensive transaction logging and audit trail mechanisms, ensuring **100% traceability** for payment workflows.
- Designed secure authentication, role-based access control workflows, and protected transaction endpoints.

DailySamachar | Kotlin, XML, Retrofit

🐙 GitHub

- **Increased user engagement by 25%** by enabling offline access to news articles, improving accessibility and ensuring uninterrupted content.
- **Improved maintainability and scalability by 30%** through implementation of MVVM architecture, resulting in cleaner code structure.
- Integrated REST APIs using Retrofit for efficient real-time news fetching, seamless content synchronization, and faster loading.

ecoGrid – Real-Time Microgrid Monitoring | Kotlin, Firebase, Arduino

🐙 GitHub

- Built a real-time monitoring system for voltage, current, SOC, and power metrics with **latency under 2 seconds**.
- Designed an Arduino–Firebase pipeline for continuous IoT data streaming, improving real-time monitoring accuracy by **35%**.
- Developed an interactive Android dashboard for real-time visualization and monitoring of energy consumption trends.

TECHNICAL SKILLS

Programming Languages: Kotlin, Java, JavaScript, SQL

Library: Retrofit, React.js

Backend & Frameworks: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL, Firestore

Cloud: AWS, Docker, Firebase

Authentication & Security: JWT, Firebase Authentication, RBAC

Core Concepts: OOP, DSA, DBMS, Operating Systems, System Design

ACHIEVEMENTS

- **CodeChef:** Ranked in **top 300** among thousands of participants.
- **LeetCode:** Earned **3 badges** for consistent daily coding streaks.
- **Open Source:** Contributed **5+ merged PRs** across Sugar Labs and Hacktoberfest.
- **Smart India Hackathon 2024:** Secured **12th rank**.
